(ISC)²® INSPIRING A SAFE AND SECURE CYBER WORLD.

Dear Sujay Adkesar,

Congratulations! We are pleased to inform you that you have provisionally passed the Certified in Cybersecurity (CC) examination. By passing this examination, you have completed the first of three steps toward earning your certification!

The next step is to complete the **online application**, which you must do within nine months of your exam date. Work experience is not required to earn the CC designation, however by completing the application you are verifying you have read and understood the (ISC)² Code of Ethics.

Once your application is completed, the final step in the process is to pay your first Annual Maintenance Fee (AMF). Once your AMF payment is made, you will earn your certification. If you already hold an (ISC)² certification or associate status, you will not have to pay an additional AMF for your latest certification.

As always, if you have any questions or concerns, you can email us at membersupport@isc2.org or call us at +1.866.331.4722.

Sincerely,
(ISC)² Member Services Team
